Criterion 7 – Institutional Values and Best Practices

Key Indicator – 7.2 Best Practices

7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual

BEST PRACTICE I

Title of the Practice: Nurturing Holistic Excellence for Tomorrow's Leaders

Objectives of the Practice:

- To ensure students receive quality education & excel in their chosen fields of study.
- To facilitate self-awareness, self-confidence, & resilience among students.
- To encourage active participation in committees, organizations, & community service to foster teamwork, leadership, & empathy.
- To encourage students to think critically, solve problems creatively, & express themselves through various mediums.

The Context:

The practice emphasizes developing students who possess not only technical skills but also empathy, ethics, & a broader understanding of societal needs. It signifies a shift from traditional leadership training to a comprehensive approach that fosters personal growth, resilience, & social responsibility. The practice highlights the importance of integrating leadership development with opportunities for personal reflection, cultural awareness, & community engagement.

The Practice:

Our institution recognizes the significance of nurturing holistic growth amongst students & provides a comprehensive approach which integrates various elements of personal, academic & professional development.

- Our teachers promote critical thinking, creativity & problem solving skills through the curriculum during lectures through varied teaching methodologies like discussions, debates, quizzes, digital sources etc.
- Career Guidance & Placement Cell of the institution organizes sessions like How to Craft Your Resume, Interview Etiquette, Brandup with LinkedIN etc., also provides internships which allow students to enhance their practical skills and apply classroom knowledge in real life situations.

- Various departments & committees host workshops & seminars focused on personal development covering topics like stress management, communication skills, gender sensitization, health & fitness which encourages students to prioritize self-care.
- Institution celebrates diversity & inclusivity through cultural programs wherein students engage with people from different backgrounds.
- Committees like NSS, DLLE, WDC, Green Club provide avenues for students to develop leadership skills through organization of events, community engagements, training programs etc.
- The Research Cell of the institution supports research initiatives of the students and encourages them to explore new ideas in their fields of interest.

Faculty members strive hard to encourage students to reflect on their values, goals, strengths, & areas of growth and provide feedback & support to help them achieve their full potential.

Evidence of Success:

Over the course of time with improved academic performance, enhanced interpersonal skills, strengthened leadership & organizational skills, increased community involvement, participation in activities is observed amongst students. Broader self-awareness & career readiness is also observed. Many students have proved their skills & talent through participation & winning at different extracurricular activities at various levels. Also many students have been placed in reputed organizations in varied fields.

Problems Encountered & Resources Required:

- Encouraging students to take active part in different activities outside of regular curriculum is a major challenge as they perceive them as unrelated to their future goals & many a times not able to understand the significance at specific period of time. Also, creating newer strategies to incentivize participation & continuous learning of students.
- Measuring the effectiveness of organized activities & assessing student outcomes related to holistic excellence becomes challenging.
- Sometimes, different external factors at institutional & personal level like unconscious bias, cultural barriers, economic downturns, social unrest and uncertainty impacts the overall performance of students.

Problems Encountered & Resources Required

- Creating awareness about entrepreneurship programs is challenging due to the prevailing mindset of job culture, as students consider business as a risky path.
- Retaining students interest in entrepreneurship programs for a longer period of time becomes difficult as there is limited awareness or perceived value of such programs among the student.
- Implementation of newer strategies to engage students and develop novel ideas becomes difficult due to inconsistency and uncertainty of students.
